

Cambridge University Press (<http://journals.cambridge.org/>)

Cambridge University Press (CUP) is the oldest, largest and most prestigious printer and publisher in the world. The CUP is publishing since 1584 continuously in subject areas like humanities, social studies, archaeology and anthropology, nutrition, Religion, biomedical sciences, law, physical sciences, medical sciences etc. The Press currently publishes over 220 peer-reviewed academic journals for the global market. A user can access its 194 journals through the UGC-Infonet Digital Library Consortium from the year 1997 onwards.

Browse

Cambridge University Press provides the following options for browsing the journals

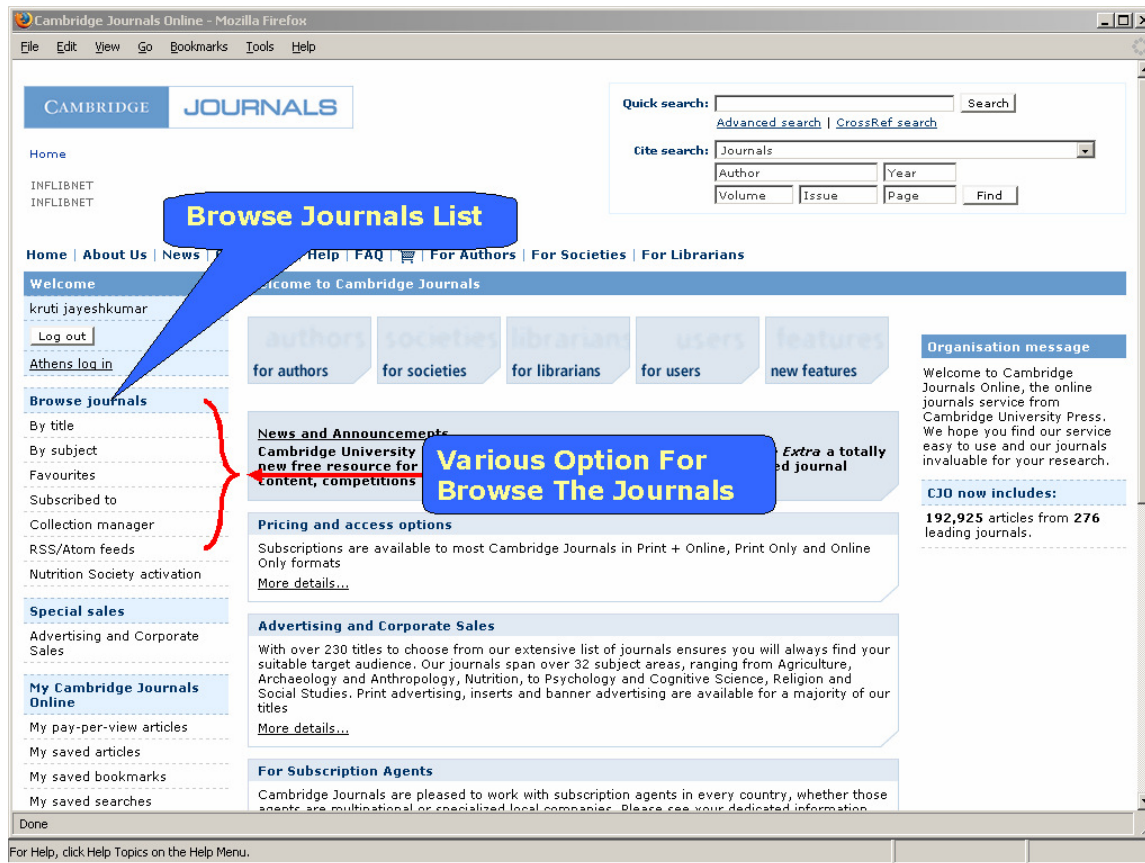

By Title: It facilitates the user to browse entire list of journal in an alphabetical order. A user can either scroll down the list or click on the desired letter at the top of the page. Clicking on a journal title, it displays the journal homepage.

By Subject: This feature allows the user to browse journals by subject. All available subjects are listed at the top of the page. Click on a subject to view the list of journals, available in the related subject area.

Favourites: It facilitates the user to go straight to key areas of interest. This section is divided into two subsections i.e. **Favourite Journals**, a list of journals selected particularly by the users. **Favourite Subjects** displays the journals of Cambridge University Press organized by subject category.

Subscribed to: It displays the list of journals, which are subscribed by an institution. It also display list of journals if it is offered free to all the visitors by CUP.

Click on appropriate option given in the **Browse Journals** panel in the left-hand navigation bar.

Journal list is bulleted with the following icon abbreviations:

- H** :Full-text html as well PDF articles available
- F** :Indicates that certain articles are free. This free access may be available to all users or to a particular organisation member
- T** :Indicates that access to certain articles is available on trial basis. This trial access may be available to all uses or to the users in a particular organisation for a specified period of time
- I** :Indicates individual access of certain articles
- O** :Indicates organization access of certain articles
- C** :Indicates subscription to current year of journal
- P** :Indicates subscription to previous year of journal
- A** :Perpetual access

After selecting the appropriate option, a user can get list of journals. To view content of the journal, click on journal name.

For new content alerts and a sample issue, click here

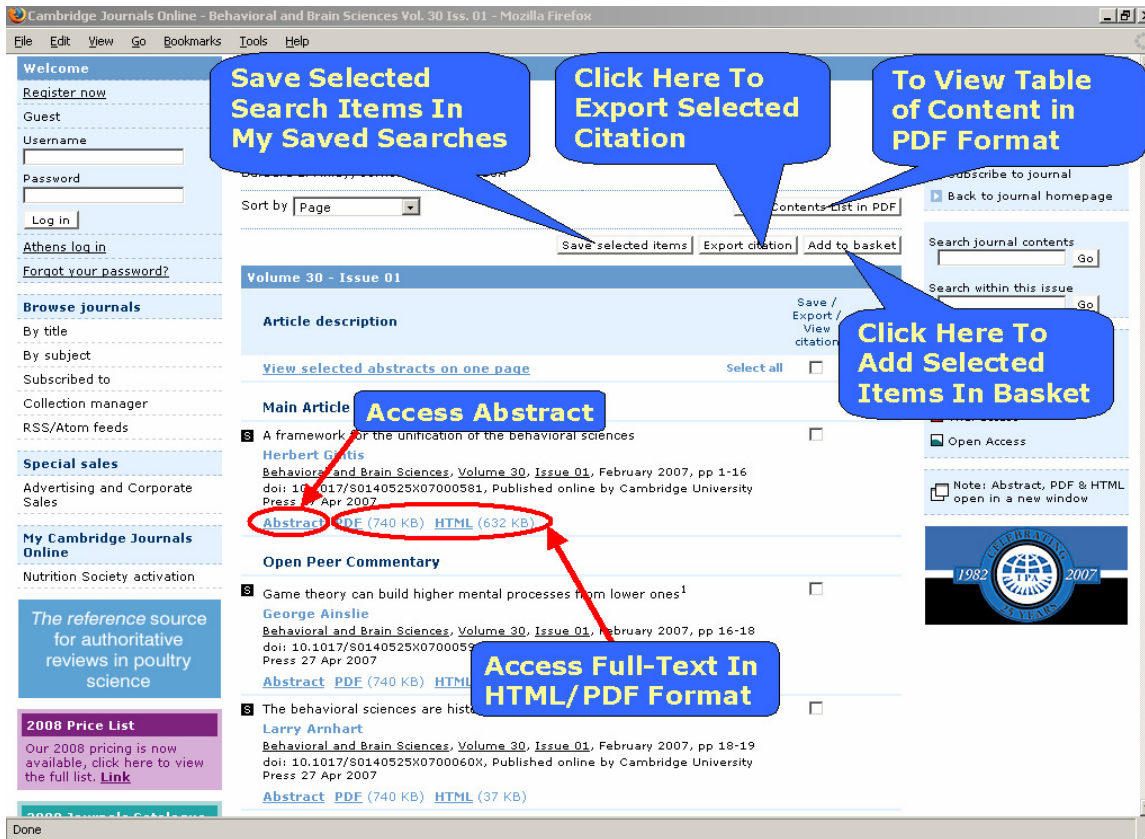

On clicking at the name of the journal, homepage of the journal is displayed. A user can select an issue of the journal to go to the table of content. A user can also choose an option from the drop-down menu to view the articles by various types. It facilitates the user to view the most popular articles published in a particular journal during the **previous 12 months** or **previous month**

The screenshot shows the journal's homepage for 'Behavioral and Brain Sciences'. It includes a login section, a search bar, and a table of contents for the 2007 Volume 30. Callouts highlight key features: 'Select Volume and Issue No. To View Table of Content' points to the volume and issue selection; 'Browse Top 10 Most Popular Articles of This Journal During the Previous Month' points to the 'Previous month' and 'Previous 12 months' options in the 'Top 10 most read articles' section; 'User Can Also View The Articles By Various Types' points to the 'Select Type' dropdown menu; and another 'Browse Top 10 Most Popular Articles of This Journal During the Previous 12 Months' callout points to the same options.

This page displays table of contents of a particular issue, which is arranged by article type and sorted by page number. Each articles contains title, author(s), journal title, volume, issue, circulation date, page number, DOI, the date it was published online and links to the abstract, the shopping basket and Full-text PDF/HTML link for subscribed users.

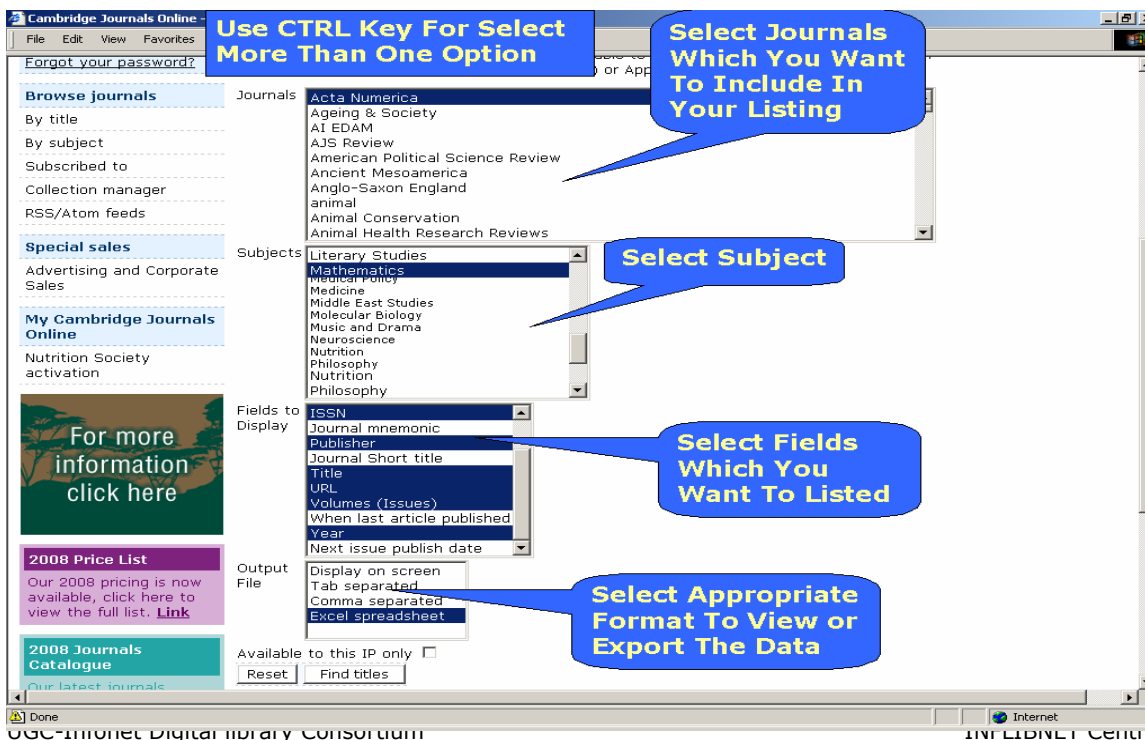

- It facilitates the user to sort the contents in a different way. A user can sort by page, author, title, article type and published date.
- It facilitates the user to view table of contents in PDF format and save it to the desktop.
- It facilitates to export selected citation to desktop or user can e-mail it to a colleague.

Click on appropriate option to view abstract or full-text PDF / HTML articles as shown below:

Browse journals by Collection Manager

The collection manager facilitates the user to retrieve information from the Cambridge Journals Online Database. It also facilitates the user to download the information in a convenient format so that it can be used with other applications. It is particularly useful for Account Administrators and librarians to produce listings, check claims or create deep links to journal homepages from their OPACs. It is also useful for individual users to check which journals they should have access to

It displays the following outputs. A user can select appropriate option from drop-down menu to sort the result in different way. To export the data click on **Download** button

The screenshot shows the Cambridge Journals Online interface. The main search results table is as follows:

Year	Volumes (Issues)	Title	ISSN	Published for	URL
2000	V9 (00-00)	Acta Numerica	0962-4929	Cambridge University Press	http://journals.cambridge.org/iiid_68664
2001	V10 (00-00)	Acta Numerica	0962-4929	Cambridge University Press	http://journals.cambridge.org/iiid_137194
2002	V11 (-1--1)	Acta Numerica	0962-4929	Cambridge University Press	http://journals.cambridge.org/iiid_165638
2003	V12 (-1--1)	Acta Numerica	0962-4929	Cambridge University Press	http://journals.cambridge.org/iiid_165622
2004	V13 (-1--1)	Acta Numerica	0962-4929	Cambridge University Press	http://journals.cambridge.org/iiid_227240
2005	V14 (-1--1)	Acta Numerica	0962-4929	Cambridge University Press	http://journals.cambridge.org/iiid_298721
2006	V15 (-1--1)	Acta Numerica	0962-4929	Cambridge University Press	http://journals.cambridge.org/iiid_439259

The 'download' window shows a table with the following columns:

Search

The search interface of CUP provides options to search the content of journals on Cambridge Journals Online

- Quick Search
- Cite Search
- Advanced Search

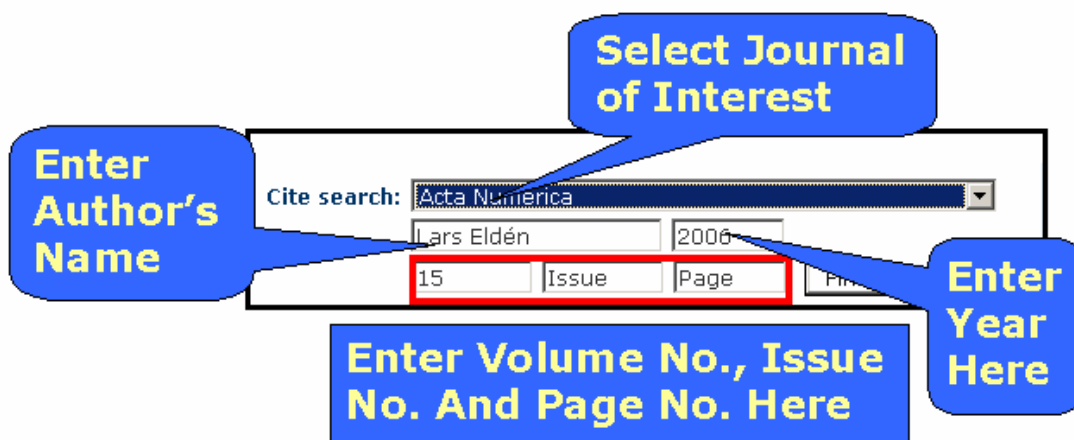

Quick Search

The Quick Search box appears at the top right-hand side of every page throughout the site. To use the Quick Search facility, enter the search terms into the box and click **Search**. This will run a search across the full text of all articles on the site and their associated metadata fields (title, author names, keywords, etc).

Cite Search

To use **Cite Search** first select the journal of interest using the drop-down menu. Click on **Find**, it will display journal's homepage. A user can use any or all of the other fields like Author, Year, Volume, Issue, and Page to narrow down the search further. On filling in the Volume and Issue fields a user will be taken directly to the table of contents page of a given journal.

Advance Search

The Advanced Search facility allows to refine the searches to increase the relevance of search results. To perform advance search follow the steps given below:

- Select appropriate option from drop-down menu related to search terms
- Enter search term(s) in the first text entry box
- Select Boolean operator
- Select next search field from the next drop-down menu for more targeted search
- Enter search term in next text entry box
- Click on **Search** button

Example given below will search an article on **Data mining** in article title, written by author **Jie Yang**.

Advanced Search

Enter your search terms in the drop-down boxes. Empty "Search for" fields will not be included in the search.

Search	Search for	AND/OR
Article Title	Data mining	AND
Author	Jie Yang	AND
Article Title		AND
Author		AND

- Music and Drama
- Neuroscience

Select Specific Subject From Which You Want to Search

Reset Search

By Date - A user can also refine the searches by publication date by selecting months and years from drop-down menu as shown in the screen shot.

(**Note:** the publication date is the cover date of the journal issue)

Number of results per page - To choose how many search results will display on each page

Exclude book reviews - To remove book reviews from the search results

Only search journals you have full access to - To remove from the search results any articles that user do not have full-text access to

Specific article type - allows to restrict the article types to be displayed by choosing from a drop-down menu

Fields to be included - To choose fields, which a user would like, displayed on the search result page

The screenshot shows a search interface titled "Enhance your search". It includes several sections:

- By Date:** Two sets of dropdown menus. The first set is labeled "From:" with "Month" (January) and "Year" (1900). The second set is labeled "To:" with "Month" (December) and "Year" (2007).
- Number of Results on page:** A dropdown menu set to "10".
- Exclude Book Reviews:** A checkbox that is unchecked.
- Only search journals you have full access to:** A checkbox that is unchecked.
- Specific Article Type:** A list box containing: Abstracts, Addenda, Announcement, Article Commentary, Book Reviews, Books Received, Brief Report, Calendar, and Case Report.
- Fields to be included:** A list box containing: Author(s), Journal Title, Volume No., Issue No., Issue Date, doi, Publication Date, Page Range, ISSN, and EISSN.

CrossRef Search

Cambridge University Press is taking part in the CrossRef search Publisher Pilot, a cross-publisher initiative. A group of 45 leading journal publishers are participating in a CrossRef Search Pilot. There are approximately 6.5 million items now indexed. A user can search the full-text of scholarly articles through CrossRef search.

Above Query has returned one matches as shown below. A user can refine the searches within the results

The screenshot shows the Cambridge Journals Online search results page. The browser title is "Cambridge Journals Online - Search Results - Microsoft Internet Explorer". The page displays search results for a query, showing one match. The search results are sorted by Relevance, and the first result is "DMiner-I: A software tool of data mining and its applications" by Jie Yang, Chenzhou Ye, and Nianyi Chen. The result is listed in "Robotica", Volume 20, Issue 05, Sep 2002, pages 499-508. The DOI is 10.1017/S0263574702004307. The result is published online by Cambridge University Press on 06 Sep 2002. The result is available in PDF format (467.7 KB). The page includes navigation options like "View selected abstracts on one page", "Add to basket", and "Export citation". There are also options to "Save search", "Save selected items", and "Add to basket".

Callouts on the page include:

- "Refine Your Search Within Results" pointing to the search filters.
- "Select This Option For New Search" pointing to the "Search within results" radio button.
- "Access Abstract" pointing to the "Abstract" link in the search results.
- "Access Full-Text Article in PDF Format" pointing to the "PDF" link in the search results.

On clicking at the **Abstract** in the record given above, the screenshot of abstract is given below:

The screenshot shows the abstract page for "DMiner-I: A software tool of data mining and its applications". The browser title is "CJO - Abstract - DMiner-I: A software tool of data mining and its applications - Microsoft Internet Explorer". The page displays the abstract text, author information, and a form to email the abstract. The abstract text describes DMiner-I as a software tool for data mining, including techniques like regression, artificial intelligence, knowledge regression, computational intelligence, neural networks, genetic algorithms, association rule, fuzzy rule, neural network algorithms, and knowledge representation. The abstract has been satisfactorily applied in the treatment and diagnosis of brain glioma. The abstract was received on May 11, 2002. The key words are "Data mining; Knowledge representation".

Callouts on the page include:

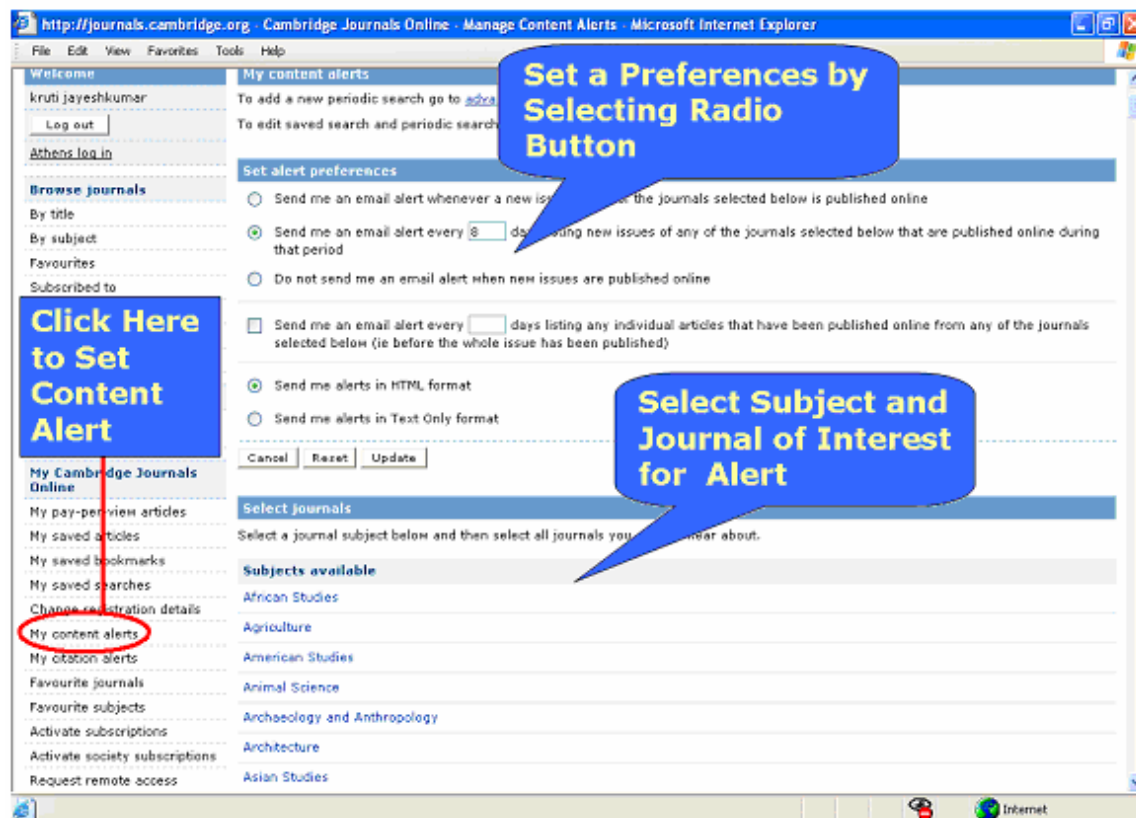

- "Access Full-Text PDF Articles" pointing to the "PDF (467.7 KB)" link.
- "Set Content Alerts" pointing to the "New content alert" link.
- "Set Citation Alerts" pointing to the "Citation alert" link.
- "Email abstract" pointing to the "Email abstract" link.

The "Email abstract" form includes fields for Name*, Department*, Email*, and Message, along with "Reset" and "Submit" buttons.

My Cambridge Journals Online (Personalization Option)

Content alerts

A user can get e-mail when new journal content are published on Cambridge journal online. A user can set up content alerts in a number of different ways using the **My Content Alerts**. Depending on preferences user can receive table of content or information about individual article. **Set Alert Preferences** section allows the user to decide what kind of alert, how often and in which format he/she wants to receive them.

Citation Alert

It facilitates the user to receive e-mails when articles of interest are cited in another publication. It is available for all articles published in HTML. A user needs to have registered to use this feature. Click on citation alert in full-text HTML or abstract page, it will take the user to new page called **My Citation Alerts** which will be displayed all selected articles

My Saved Searches

My saved searches option facilitates the user to retrieve previously saved searches. The page is divided into two section: **i) Saved Search Results** used to save a set of search results. To access a saved search results, click on the **Search Title** link in the **saved Search Results** section of the page. **ii) Saved Search Parameters** used to save a set of search parameters which have used in a quick and advanced search.

My Saved Articles

My saved articles option facilitates the user to view previously saved articles.

My Saved Bookmarks

A user can create bookmarks to journal homepages and table of contents so he/she can easily return to key journals or specific issues.

Request Remote Access

It facilitates the user to have temporary remote access to the organization's journal subscriptions. A user can ask his/her Account Administrator to set up this facility.

RSS/Atom Feeds

To receive news feeds, a user first need to install a newsreader on his/her computer. A user can find a list of readers at **Syndication resources** where some are free and some are paid, some support RSS or some support RSS and Atom both. Click on **Browse RSS/Atom** appears under the browse menu in the left-hand navigation panel. It display alphabetically list of journal. Select journal of interest, then click either RSS or Atom icon next to it. This will open a new page, which contains either one or two URLs. A user needs to cut and paste the relevant URLs into newsreader to get news feeds. Repeat this process for every journal.
